Your ingenuity has more chance to show itself through a rockery you build and plant yourself than in any other kind of gardening.

ROCK GARDENS, a book by F. F. Rockwell, shows how you can make one yourself. It describes and illustrates the types of rock gardens, tells what soils, climates, and locations are best, how to construct, and what to plant for the effects you want to create.

Poultry is especially benefitted by Conkey's Y-O. Extreme methods employed to increase egg production and force breeding stock robs poultry of vitamins which this product restores.

NITRATE OF SODA

1,000 pounds of Nitrate of Soda will furnish more nitrogen to plants early in Spring than 100 tons of well-rotted manure. The stable manure may help furnish nitrate for later crops, but for his early crops the gardener who fails to use Nitrate of Soda is blind to his own interest. It is usually applied at the rate of 100 to 200 pounds per acre on land previously dressed with barnyard manure. To secure an even distribution mix the Nitrate well with from 3 to 5 parts of loam or sand. We will be glad to furnish you free books on the use of Nitrate of Soda. Price per 100 lbs., \$6.50, f. o. b. Sedalia.

To Produce a Good Lawn

Plow or dig up the surface thoroughly to a depth of 12 inches and mix the soil with well rotted manure or our Archias' Sure Lawn Fertilizer, the latter being at all times preferable, as it is more durable in its effect and free from weed seeds, which are always contained in more or less quantities in stable manure.

The soil should be well pulverized before sowing, and the lawn kept free from weeds the first season. The quantity of seed required is one pound to every 300 square feet.

Latham Raspberry

(Minnesota No. 4)

Yields Twice as Much as Other Red Raspberries.
Here is a new red Raspberry that was originated in Minnesota and acclaimed for its hardiness in that state. During the past few years its merits have spread with its planting throughout the middle and eastern states. The high yielding ability of the Latham is due largely to its resistance to Mosaic and other red Raspberry diseases; wherever tried, reports have been most favorable. It possesses the hardiness of "King" and produces very strong, vigorous, thornless canes; very productive. Berries are large, of highest quality, ripen evenly and hold up well throughout the season. The canes do not need covering even in severe locations. We have a fine stock of this splendid new variety and hope you will give it a thorough trial, as we are sure it will prove a money-maker for you, especially in a season when other standard varieties freeze out. Each, 15c; 3 for 40c; 12 for \$1.00; 25 for \$1.65; 100 for \$4.50, postpaid.

Archias' Delicious Table Grapes

Every home should have a dozen or more Grape vines planted on an arbor or along the garden fence. They are delicious to eat fresh from the vines; can be made into the most health producing grape juice; and jelly—well who doesn't like Grape jelly? Once planted the Grape vines will continue to yield for years with practically no special attention. Our Grapes are strong, well rooted plants that are sure to grow for you.

Worden (Blue)

A valuable blue Grape ripening from three days to a week before Concord. Berry large, of good quality; thin skin; very productive; vine a strong grower. The most popular blue Grape grown today. It comes in early enough to avoid the rush of Concord, thus brings from one to three cents per pound more.

Moore's Early (Blue)

A large blue Grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield; very valuable as an early Grape.

Niagara (White)

The most popular white Grape in existence. Fruit large and very productive; a good grower; ripening same season as Concord; equally good; valuable in every way.

Brighton (Red)

One of the best red Grapes in cultivation. Bunch large and compact; a strong grower and very productive; quality good.

Agawam (Deep Red)

Deep red, large bunch, berries large, meaty, with rich, aromatic flavor. Ripens a little after Concord.

Concord (Black)

An old variety; does well wherever planted; good size; productive.

Moore's Diamond (White)

The color is a delicate greenish white, with a rich yellow tinge when ripe. Very few seeds, juicy, and almost transparent. Berry size of Concord and two weeks earlier.
